To Our Valued Customers,

With the latest United States Government information regarding Covid-19, Hayward Flow Control is closely monitoring the situation and taking all appropriate actions to insure the safety and welfare of our team and customers. We will provide further updates as required.

Our full-scale US based manufacturing and supply chain operations in North Carolina are fully functional and ready to support our customers' needs as required. We do not anticipate the need to suspend operations or any disruptions of supply. We have implemented all suggested guidelines as provided by the Centers for Disease Control and Prevention (CDC) throughout all aspects of our operation, and we will continue to follow the guidance as provided by Federal and State authorities.

As such, some of our staff will be working remotely for the foreseeable future. Visits to our sites are not possible for the time being. All travel activities of our employees have been discontinued and meetings are to be held virtually until further notice.

Despite the challenging times and circumstances, Hayward Flow Control will continue operations in a safe and efficient manner in order to ensure that our products are made available to support the many needed and essential production processes globally and future recovery.

We thank you for your understanding and continued support. Stay safe and healthy. We will all get through this. As Matthew McConaughey recently said so well, every red light turns into a green light.

Sincerely,

Hayward Flow Control
