To: Our Valued Customers

Subject: Price Change Announcement

Dear Valued Customer,

As we are all aware, macroeconomic conditions and global geopolitics remain in a state of rapid and constant change. This has impacted all aspects of business. Domestic US manufacturers, such as Hayward Flow Control, are not immune to the influences of rapidly fluctuating global materials costs and fuel pricing.

As a result, we want to inform you of the necessary adjustments to our pricing structure. Hayward Flow Control will be implementing an average overall price increase of **3%** that will be effective on all orders received opening of business starting **15 June 2026.**

This is not a step we take lightly or without deep analysis. We continue, as we always have, to enforce rigorous cost control measures across our business to ensure we minimize these price increases in every possible way for our customers.

Our new Price List, **CHPL26**, has been published electronically in an Excel format on our website and will go into effect for all orders received opening of business starting 15 June 2026. The new Price List is available here: https://www.haywardflowcontrol.com/en_ca/price-lists.

As a demonstration of these cost containment practices, the 2026 Price List will be available in an electronic format only. This will include a searchable Excel file as well as an interactive PDF catalog. The interactive PDF catalog will be published on our website soon.

We would also like to remind all distribution partners that in 2024 we launched an industry-leading platform called **PipeLine** to allow for easy access to product information, pricing, and order history. Distributors who use this platform benefit from streamlined order placement, tracking, and instant access to pricing. If you have not done so, sign up for PipeLine now. It is free.

Please feel free to contact your local sales rep directly or our Customer Care Team if we can be of further service to you. Our customer care team can be reached at:

- **Canada:** 888-238-7665 or hflowcanada@hayward.com

We thank you for your continued partnership in 2026 and beyond.

Sincerely,

Joseph G. Romano
General Manager
