## Hayward's Statement of Quality Policy

Through the commitment to continuously improve our quality management system, Hayward Flow Control shall provide our customers, both internal and external, the resources, environment, products and service required to meet and exceed their expectations.

## NSF/ANSI Standard 61 and NSF/ANSI 372

NSF/ANSI Standard 61 is a standard defining the requirements for products that are destined for use in drinking water systems. In summary, the standard requires immersion testing of all products that will come into contact with drinking water for any chemicals, compounds, elements, etc. that may leach into the water that passes through the product.

Hayward products that are NSF 61 certified can easily be found on the NSF website, [www.NSF.org](http://www.NSF.org). Additionally, those products certified to NSF61-G are also certified to NSF/ANSI 372 and conforms with the lead content requirements for "lead free" plumbing as defined by California, Vermont, Maryland and Louisiana state laws and the U.S. Safe Drinking Water Act.

The following Hayward Flow Control products comply with this directive:

## FLV SERIES STAINLESS STEEL BASKETS

Available in both single and double lengths, the 316 Stainless Steel basket provides a highly efficient option for increased differential pressure conditions. The basket itself provides the structural strength required when processing highly viscous materials or when experiencing high solids loading.

The construction of this basket prevents by-pass of unprocessed fluids. With enhanced strength, it allows for a wide application range for the FLV Series bag filters. The large open area ratio, robust construction and easy installation makes this design an optimal choice for demanding chemical and corrosive applications. Features 316 SS baskets with basket ring assembly\* and FPM seals. For EPDM, change suffix "VS" to "ES." List prices same as FPM. **Use with PP ring style bag.**

If a filter vessel is needed, choose CFLV Series Filters from [pages 84-85](#).

3. **THREE YEAR WARRANTY:** All products<sup>1</sup> manufactured by Hayward Flow Control are warranted against defects in material or workmanship for a period of three years from date of shipment<sup>2</sup>. Our sole obligation under this warranty is to repair or replace, at our option, any product or any part or parts thereof found to be defective. **HAYWARD MAKES NO OTHER REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.** The warranty set forth above is the only warranty applicable to Hayward products and in no event shall Hayward be liable for any delay, work stoppage, cartage, shipping, loss of use of equipment, loss of time, inconvenience, loss of profits of any direct or indirect incidental resulting from or attributable to a breach of warranty. **The remedies under this warranty shall be the only remedies available.
